EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering
ITM Skills University
2025 – Present (2nd Year)

PROJECTS

PetMatch — Pet Adoption Portal

Live Demo | GitHub

React.js, JavaScript, Node.js, Express.js, MongoDB, Mongoose, JWT, Firebase Authentication, Socket.IO, Firebase Cloud Messaging

- **Built a full-stack pet adoption platform** where users browse pets and submit applications, and admins manage listings and review applications.
- Built Express.js REST APIs with JWT and Firebase authentication; added Socket.IO live updates and FCM push notifications.

Quiz Arena — Real-Time Quiz Platform

Live Demo | GitHub

JavaScript, Node.js, Express.js, Socket.IO, MongoDB

- **Built a multiplayer quiz platform** with PIN-based rooms, synced questions and timers, server-side scoring, custom quizzes, and document import.
- Implemented user authentication, persistent hosted/played quiz history, detailed performance reports, live leaderboards, and a winners' podium.

Chatterly — Real-Time Chat App

Live Demo | GitHub

React, TypeScript, Node.js, Express.js, MongoDB, Socket.IO

- **Developed a full-stack chat app** with authentication, direct and group conversations, real-time messaging, profile management, and media uploads.
- Added message editing, deletion, reactions, pinning, user search and blocking, notifications, and AI-powered chat summarization.

Vox Commander — Voice-Controlled Notes App

Live Demo | GitHub

React.js, JavaScript, Web Speech API, Local Storage

- **Built a voice-controlled notes app** using React.js and the Web Speech API.
- Built reusable React components with Hooks; added Local Storage persistence, PDF export, and a responsive UI.

Eventify — Java Event Management System

GitHub

Java, Swing, Object-Oriented Programming, Collections Framework

- **Developed a Java Swing desktop application** for browsing, searching, and booking events, with admin booking and event management.
- Modular OOP design using ArrayList, LinkedList, HashMap, and TreeMap.

MemGrid — Distributed Shared Memory Simulator

GitHub

C++, AVL Trees, Hash Maps, Graphs, Priority Queues, Dijkstra's Algorithm

- **Developed a Distributed Shared Memory simulator in C++** using AVL trees, hash maps, graphs, and modular object-oriented design.
- **Optimized node communication** via Dijkstra's algorithm and priority queues.

WeatherScope — Weather Information Application

Live Demo | GitHub

HTML5, CSS3, JavaScript, REST API

- **Integrated a REST API using asynchronous JavaScript** (Fetch API, Promises).
- Rendered real-time weather data in a responsive UI with error handling.

SUMMARY

Second-year Computer Science Engineering student at ITM Skills University with hands-on experience developing full-stack applications using React, TypeScript, Node.js, and Express.js. Skilled in building REST APIs, database-driven applications, and real-time platforms using Socket.IO. Strong foundation in data structures, object-oriented programming, and problem-solving, with a focus on writing clean, maintainable code and creating practical, user-centric software solutions.

SKILLS

Programming Languages

C++ | Python | JavaScript | Java

Frontend

HTML5 | CSS3 | React.js | DOM Manipulation | REST API Integration

Backend

Node.js | Express.js | Socket.IO

Databases

SQL (Fundamentals) | PostgreSQL | MongoDB | DBMS

Authentication and Backend Services

Firebase | Supabase

Tools and Deployment

Git | GitHub | VS Code | Vercel | Render

Core CS

Data Structures and Algorithms | Object-Oriented Programming | Debugging | Computer Networks (CN) | Problem Solving

TRAINING / COURSES

- Data Structures & Algorithms
- Object-Oriented Programming
- Database Fundamentals
- Software Engineering
- Web Development
- Operating Systems
